Context

PRODUTECH DIH is a multi-regional digital innovation hub, part of the European Digital Innovation Hubs Network, bringing together 19 organisations to support the digital transformation of the manufacturing industry, with a strong focus on production technologies.

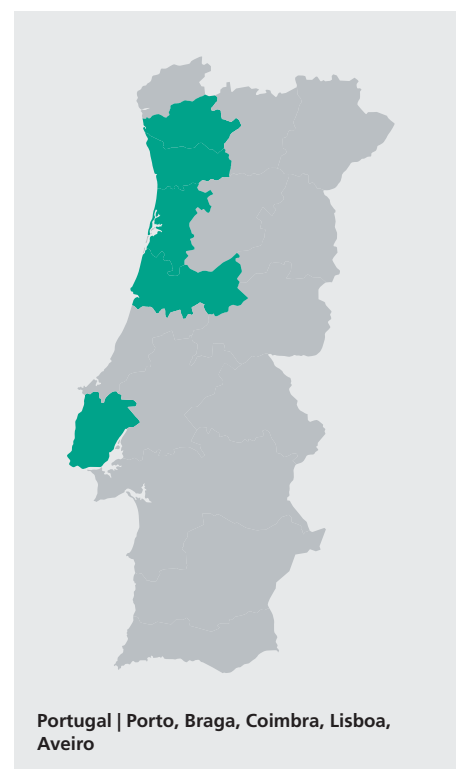

Goals

The initiative aims to provide coordinated access to support services aligned with the four core functions of the European DIH model: testing before investing, skills and training, access to funding, and ecosystem development. Through the PRODUTECH DIH Portal and its network of access points, the hub facilitates digital transformation by offering road mapping, technology validation, capacity building, and business innovation services.

Impact

By consolidating existing national and European initiatives, PRODUTECH DIH

enhances industrial competitiveness, reduces regional digitalisation disparities, and empowers companies to leverage digital transformation for new business models and innovative products.
